Subject: Release of the new Supplier Quality Manual MAN.QLTY- 08 rev 04

Dear valuable Supplier,

In order to ensure the highest level of excellence and provide a quality performance which strives for the full satisfaction of its Customers, Brembo is engaged in a continuous evolution of its products, production processes and Quality Management. It is with such spirit that the Supplier Quality Manual has been updated, integrating new features into its content (i.e. requirements for mechatronic components and software), more accurate descriptions of some requirements and also aligning it to the most recent Automotive standards' classification.

We are aware that our Suppliers represent a fundamental resource for the Organization and that *Partnership* is what a successful relationship must be founded upon. Hence, this document has been updated in continuity with its previous version, providing an effective support for a better comprehension of all the Quality requirements which regulate the supply relationship, from the Supplier selection phase to series production.

The new revision of the Supplier Quality Manual, which remains a schedule of the General Terms and Conditions of Purchase ("*GTCoP*"), shall be considered effective starting from Jan 1st 2024 and it is available at www.brembo.com.

For any clarification you can refer to your reference person in the Quality Department – Supplier Quality Development.

Best regards

M. Borsari

Chief Quality Officer

B. Sarti

Chief Purchasing Officer
