

THE APPLICATION SPECIALIST

Dear CUSTOMERS / SUPPLIERS

SUBJECT: MANDATORY REQUIREMENT OF ENVIRONMENTAL LABELING FOR PACKAGING

From January 1st, 2023, the obligation of environmental labeling of packaging comes into force, which provides for the identification of the materials which the packaging is made of and the indication for their correct management at the end of their life.

The standard requires that all the packaging, placed on the Italian business, must be appropriately labelled according to the procedures established by the applicable UNI technical standards and in compliance with the determinations adopted by the European Union Commission, to facilitate collection, reuse, recovery, and recycling of packaging, as well as to provide to the users the correct information on the final destinations of packaging. In addition, the obligation for manufacturers to indicate - for the purposes of identification and classification of the packaging - the nature of the packaging materials used, based on Decision 97/129 / EC.

This later obligation also involves the destination circuit of the B2B packaging, that is not intended for the final consumer, but for production intermediaries, who will therefore have the obligation to provide the identification of the packaging material used on the label, based on the Decision 97/129 / EC.

PMP Pro-Mec S.p.A. therefore requires to all Customers / Suppliers to start using appropriately labelled packaging as required by this new regulation.

From January 1st, 2023, this will be a fundamental requirement that will be reported on Purchase Orders / Order Confirmations, as well as a legal obligation.
