A world class Test Center within corrosion testing

With 15 years of experience from Global OEM requirements on corrosion you will find Proton Technology equipped to help you with most of your tests and verifications.

Proton Technology offer,

- Corrosion and surface analysis tests according to over 250 standards,
- Process and product verification agreements,
- We can act as your own internal laboratory,
- We can recommend the right standard, but also customize test methods based on your needs,
- You can expect full service with short lead-times, your own designated test engineer and customized reports,

**Accredited by SWEDAC
and part of the international
accreditation network ILAC.**

SE006911-1 / SE006912-1
