

(XX-Changeble Index Nr.; YY-Changeable Vers. Nr.)

Change of identification with exchangeable inserts. Part identification must be readable after coating.

Machining/ Processing Information

Surface protection requirements:

Galvanisation according DBL 8451.15

2 checking dimensions are hallmarked as such

(further) Test requirements

1 <!> KPC - identification

General requirements

every batch

Surface protection:

For prototypes/series production launch phase with additional

temporary surface protection with Anticorit MKR-7 according to

3 Measuring of check dimensions at beginning, while an at the end of

4 Holediameter testing with cylindrical plug gauge permitted

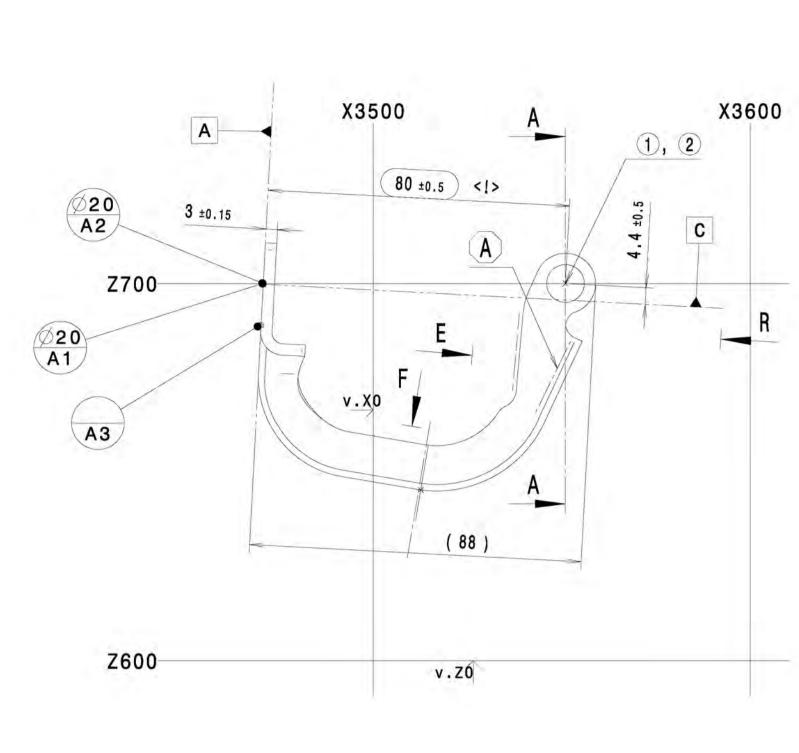

1 Environmental specification according to DBL 8585

Solvo San

continuous part number (engraved, readable after Coating).

Area of contact in holes min. 50%, only for adjustments
